

Patient Name : Mr. KRISHNA MOHAN
Age / Gender : 38/Male
Ref By : HOME COLLECTION
Bill Date : 25 Mar 2022, 10:39
Sample Type : PLASMA

UNID : RBJD3306376035
Bill No : RBJD00158
Patient ID : RBJD00147
Collection Date : 25 Mar 2022, 10:40
Report Date : 03 Aug 2023, 17:24

KRISH-623d4e9e92621

Department of Clinical BioChemistry
Fasting Blood Sugar (FBS)

Investigation	Observed Values	Units	Reference Values
Fasting Blood Sugar (FBS)	100	mg/dL	Normal: 70 – 100 mg/dL ImpairedGT : 101 – 125 mg/dL Dabetic :>=126 mg/dL

Note:- Results are from Semi-automated Analyzer.- Kindly correlate clinically.

Department of Clinical BioChemistry
Post Lunch Blood Sugar (PLBS)

Investigation	Observed Values	Units	Reference Values
Post Lunch Blood Sugar (PLBS)	149	mg/dL	80 – 160 mg/dL

Note:- Results are from Semi-automated Analyzer.- Kindly correlate clinically.

Department of Clinical BioChemistry
LIPID PROFILE

Investigation	Observed Values	Units	Reference Values
Total Cholestrol	241	mg/dL	150 - 200
HDL Cholestrol	48	mg/dL	40 – 60-
LDL Cholestrol	158	mg/dl	Optimal- <100 mg/dl Near Optimal/Above Optimal- : 100 – 129 mg/dl Border Line High : 130 – 159 mg/dl High : 160 – 189 mg/dl Very High : More than 190- mg/dl
VLDL Cholestrol	35	mg/dl	UPTO - 80 mg/dl

Triglycerides	179	mg/dl	Normal : <150 mg/dL Borderline High : 150 – 199 mg/dl High : 200 – 499 mg/dl Very High : > 500 mg/dl
Total Cho/HDL Ratio	5.0		UPTO 5

Results are from Analyzer.- Kindly correlate clinically.

Department of Clinical BioChemistry
GLYCOSYLATED HAEMOGLOBIN (HbA1c)

Investigation	Observed Values	Units	Reference Values
GLYCOSYLATED HAEMOGLOBIN (HbA1c) <i>Hplc</i>	5.44	%	Normal : <5.7% Prediabetes : 5.7 – 6.7% Diabetic : >6.5%

Interpretation:

1. HbA1C reflects the mean blood glucose concentration over the previous 4-8wks.Improvement in glucose control occurring in the 4weeks before drawing of the sample is not well reflected in the result because formation of glycated hemoglobin is irreversible.
2. Low HbA1C values(<4%) in a non diabetic individual are often associated with systemic inflammatory diseases,chronic anemia,chronic renal failure and liver diseases.
3. Presence of variant hemoglobins(HbF,HbS,HbC etc) may result in false elevation or reduction in HbA1C values.

Results are from Immunoturbidimetry. Kindly correlate clinically.-

Department of Clinical BioChemistry
MICROALBUMIN URINE

Investigation	Observed Values	Units	Reference Values
MICROALBUMIN URINE	10	mg/L	<30.0
